

March 1, 2017

**Notice of Minor Revision of the Assessment Report and Source Protection Plan under section 51 of Ontario Regulation 287/07**

The Sudbury Source Protection Assessment Report was updated on March 1, 2017. The edits were minor in nature and also included some grammatical corrections.

The main update was to remove the 76 Provincial Tables of Circumstances since they did not conform accessibility requirements established under the Accessibility for Ontarians with Disabilities Act (AODA). The alternative option provided is the online Source Water Protection Threats Tool available at <http://swpip.ca>. This option is explained and addressed in all areas of the report where the Tables of Circumstances were previously mentioned.
